

Here at our CARE Center for Family Birth and Women's Health, women and babies come first.

We offer a full range of obstetrical and gynecological services to ensure you and your baby are happy and healthy.

Located on the 5th floor of the WHS Washington Hospital, our newly updated facility is fully equipped with advanced labor and delivery rooms, observation rooms, recovery suites, and a nursery equipped to handle infants with special monitoring needs. So you can feel confident knowing we can meet your needs.

And with 13 private post-partum rooms, you and your family will have the space and privacy to spend real, quality time with your newborn.

It's no wonder almost 1,000 babies are delivered annually at Washington Health System.

For more information or to register please call:

(724) 223-3173

Call for details or payment options as some insurance companies will cover or reimburse for the cost of the classes.
